PROFILE

Currently pursuing a Bachelor's degree in Information Technology, I am dedicated to applying my technical skills to help achieve organizational goals. My academic background has equipped me with a strong foundation in various IT disciplines, and I am eager to leverage this knowledge in a practical setting. I am committed to continuous learning and am keen to stay updated with the latest technological advancements. My goal is to contribute effectively to a dynamic team and support innovative projects. I thrive in environments that challenge me and offer opportunities for professional growth. I am enthusiastic about applying my skills to drive success and deliver impactful results.

WORK EXPERIENCE

Intern as a React Developer

JYOTI TECHNOSOFT LLP

[May 2024 – July 2024]

- Developed a Comprehensive Billing System: Built a full-featured billing system using React.js, including components for invoice management, customer profiles, and reporting.
- Implemented Authentication Features: Designed and integrated user authentication with secure login and logout functionalities, enhancing user access control and security.
- UI/UX Design: Created responsive and user-friendly interfaces, ensuring seamless interaction and navigation within the application.
- Data Management: Utilized React's Context API for dynamic data fetching and state management, ensuring real-time updates and accuracy.
- Error Handling & Debugging: Implemented robust error handling to address data fetching issues and improve application stability.
- Collaboration & Documentation: Worked collaboratively with senior developers, contributing to project planning and documentation to streamline development processes.

PROJECT

JYOTI TECHNOSOFT LLP [Billing System]

Developed a React.js billing system using Material-UI, featuring secure authentication, profile management, product inventory, real-time sales dashboard, PDF invoice management, and detailed sales reports with visualizations.
Technologies used: React.js, MUI, JavaScript, CSS.

Blog Website - [React.js]

Created a blog website using React.js and MongoDB, allowing users to upload, read, and write blogs with secure login and logout. Ensured a responsive design for seamless user experience across devices.
